To our valued customers:

HOW TO CARE FOR YOUR MARIDECK BOAT FLOOR

For general maintenance, we recommend washing your floor at the end of each season before stowing your boat for the offseason. When caring for your MariDeck boat flooring, use a mild dish detergent (e.g. Dawn) in warm water with a soft bristle deck brush. Rinse the floor thoroughly after scrubbing. For ground in dirt, mildew, or minor stains, any citrus based cleaner (e.g. Orange Glo, Citrus Magic) may be used safely on the MariDeck product. Simple Green is also safe to use on MariDeck. Spray the offending area with the cleaner and let it soak for approximately 10 minutes before using a paper towel to wipe the floor clean. For tougher stains, you can try using Tilex or CLR, but do not allow these cleaners to sit on your flooring for an extended length of time and thoroughly rinse the sprayed area afterwards. Regardless of which cleaner you choose to use, carefully read each cleaner's instructions and recommended use. Minimize potential damage to your flooring by testing harsher cleaners on a concealed section of your boat floor before using the cleaner on a more obvious section of the floor. If unsure, contact the manufacturer and ask if the cleaning product is safe to use on vinyl. Please call our customer support if you require further assistance in cleaning your MariDeck floor.

Sincerely,

The MariDeck Team
